

K-LOVE Radio has provided a service via radio waves to the Sonora, California that is unavailable via any other source...a radio station where I don't have to censor what my family hears. There is no other source of such programming available on the radio or on television. If LPFM radio stations are allowed to preempt repeater type radio stations which broadcast over a network, KLOVE will not be able to continue broadcasting in my area and our community will lose this valuable resource. Not only does KLOVE Radio provide a safe listening environment to my family, but numerous public services are also provided including, public service announcements, announcements regarding descriptions for those who need spiritual, emotional, or personal help, and an uplifting media which, in my humble opinion, is a light in the darkness of secular media. The loss of KLOVE radio, if LPFM frequencies are allowed to take priority over national or regional radio service, will be a community tragedy. More lives have been positively changed by KLOVE radio, than by any other radio source that I know of.

Please do not allow LPFM programming to be given priority over national or regional radio services.
